

Wellness

We create interactive videos, consumerism guides, newsletters, articles and home mailers to educate and engage employees and spouses in becoming better managers of their healthcare and well-being. We use personas to show how various employees use wellness program resources and benefits.

What Is an Interactive Video?

Interactive videos are posted on a secure, external server for employees and spouses to access from any computer, tablet or smartphone. Viewers can download pdfs or link to websites while viewing the video. The video can also be posted on a portal. Click to see [How to Make an Interactive Video](#) or go to www.grohcomm.com.
